

G.W.P. 05 Offer Conditions PROTO INJECT

01. In the production of prototype tools, an up-to-date technical drawing (CAD drawing, PDF format), which has been created according to our technical instructions, is indispensable. If drawings are already submitted to G.W.P., please ignore this advice.
02. The prototype tools manufactured by us are exclusively meant for in-house use on our premises. Shipping is not possible.
- 03. Delivery Time:**
 - a. PROTO INJECT-tool/first unprocessed prototypes optionally in a similar material (G.W.P. standard material): ... working days ex works, depending on the extent of our production capacity utilization at the order date.
 - b. First processed PROTO INJECT parts, (optionally in a similar material/G.W.P. standard material), including (CNC-) post processing: approx. 3-10 working days, depending on the complexity and the machine utilization at the time of completion. Alternatively, the client can purchase unprocessed, unfinished parts and post-process them himself.
 - c. Subsequent samples/other batches after design modification of the PROTO INJECT tool: from 5 working days
 - d. PROTO INJECT molded parts: working days /pieces approx. ... / ...
- 04. Payment Conditions:**
 - a. for PROTO INJECT tool: 50% due upon placing the order, 50 % due at the time of the delivery of first molded parts
 - b. for PROTO INJECT molded parts: net upon receipt
05. G.W.P. standard packaging is included in the price.
06. The drawings presented to G.W.P. at the time of the offer shall be valid.
07. Offer period 30 days – longer commitment periods shall be agreed upon separately for each project.
08. All errors in the calculation of PROTO DIE prototypes expected.
09. Our contractual terms for PROTO DIE apply.
